

From Editor-in-Chief

Dear Readers,

In this September 2019 issue of the journal, you can find comprehensive review articles, interesting case reports, and quizzes, education on research schools and news on conference articles.

I invite all authors willing to submit their articles, to read carefully Instructions for authors , use the resources in Author's corner where you can find guidelines how to prepare manuscripts according to the design of the study: STROBE for observational study, STARD – studies on diagnostic accuracy, CONSORT – randomized controlled studies, PRISMA – for systematic reviews and meta-analysis, CARE – for case reports. For more resources on research study designs visit EQUATOR-network (1). In addition, read articles written by our editors on statistical analysis, on research topic, and requirements for research articles submitted to the journal (2-4). We would like to announce that more strict criteria would be applied while considering article for publication in our journal.

Gulmira Kudaiberdieva
Editor-in-Chief

Heart, Vessels and Transplantation

Peer-review: Internal

Conflict of interest: None to declare

Authorship: G.K.

Acknowledgement and funding: None to declare
