Content Index 2020 – Heart, Vessels and Transplantation

"Culotte" technique XX
“Double kissing crush" XX
“Kissing” dilatation XX
Acute coronary syndrome 117
Aliasing 76, 85
Arrhythmia 113
Athlete’s heart 55
Atrial fibrillation 67
Atrial septal defect 92, 120, 122
Atrioplasty 67
Atroventricular node ablation 26, 27
Bifurcation lesions XX
Bifurcation stents XX
Biomedical publishing 1, 31
Bradyarrhythmia 79
Cardiac surgery procedures 99, 111
Cardiovascular system 31, 37
Cardiovascular imaging 55
Cardiovascular diseases 89, XX
Cardiovascular risk XX, XX
Carotid artery ultrasound 76, 85
Carotid artery stenosis 76, 85
Central nervous system 45
Cholecystitis 12
Clinical practices 89
Complications 31, 33 79
Computed tomography XX
Computed tomography angiography XX
Congestive heart failure 99
Conversion 12
Coronary artery 117, XX
Coronary artery XX
Coronary artery bypass surgery XX
Coronary sinus XX, XX
Coronary angiography XX
Coronavirus 113
Correlation 99
Covid-19 31, 33, 37, 79, 89, 113, 117, XX, XX, XX
Covid-19 testing 33
Cystic adventitial disease XX
Cytokine storm XX
Diabetes 2, XX
Doppler echocardiography 16
Doppler ultrasound 76, 85
Early postoperative complications 99
Echocardiography 16, XX, XX
Education 89
Electrocardiogram 26, 27, 92, 120, 122
Epidemiology 33
Etiopathogenetic therapy 1
Euroscore 99
Experience 1, XX
Extremely low body weight 45
Female 117
Flow reversal 76, 85
Frontline workers XX
Giant left atrium 67
Giant aneurysm XX
Healthcare workers XX
High-altitude 2
His-Bundle pacing 26, 27
Hypertension XX
Hypoxia 45
Inflammation 37
Intraoperative complications 12
Junctional rhythm 79
Laparoscopic cholecystectomy 12
Lead dislodgement 26, 27
Left ventricle 40
Left main coronary artery XX
Lopinavir 79
Low risk 2
Magnetic resonance imaging XX
Magnetic resonance imaging angiography XX
Maladaptive hypertrophy 55
Male XX
Mechanisms 31
Mitral valve 40
Mitral valve replacement 40, 67
Mitral regurgitation 67
Morbidity 33
Mortality 33
Multiple organ failure 37
Myocardial performance index 16
Myocardial injury 37
Native population 2
Neurological disorders 45
NT-pro-BNP 99, 111
Nutrition 45
Obesity XX
Outbreak of pandemics XX
Outcomes XX
Overtraining 55
Pacemaker 26, 27, 79
Pandemics 31, 89, XX
Pathological hypertrophy 55
Peer-review 1, 89
Percutaneous coronary intervention 117, XX
Persistent left superior vena cava XX, XX
Polypill XX
Postoperative complications 12
Preservation of subvalvular structures 40
Preterm infants 45
Prognosis 99
Provisional T-stenting XX
Public health measures 33
Quarantine 33
Quiz XX, XX
Radiofrequency catheter ablation 26, 27
Radiofrequency ablation XX
Remodeling 40
Renal failure 99
Research school XX, XX
Research education XX, XX
Right ventricular strain 16
Right ventricle 16
Risk 2, 92
Risk factors XX
Ritonavir 79
Rivaroxaban XX
Science 89
Severe pneumonia XX
Sinus arrest 79
Smoking XX
Stenosis 76, 85
Stenting 117
Strain analysis 16
Subvalvular structures 40
Sudden cardiac death 55
Surgery outcomes 99
Surgical experience 12
Surgical risk 99
TAPSE 16
Thrombosis 37
Tocilizumab XX
Total occlusion 117
Transesophageal echocardiography XX, XX
Trials XX
T-stenting XX
Vaccine XX
Ventricular arrhythmia 92, 120, 122
Ventricular repolarization 92
Ventricular tachycardia XX
Very low body weight 45
Warfarin XX
WHO/ISH risk scale XX
Workshop XX, XX
Young XX
