

## Answer to the Letter to the Editor

### Answer to the Letter to the Editor on page : Commentary on “Cryoablation of pulmonary veins in a patient with an atrial septal occluder and atrial fibrillation: A case report”

Dear Editor,

On behalf of our entire team, I would like to sincerely thank Randa Tabbah for her thoughtful and encouraging commentary on our recent case report titled “Cryoablation of pulmonary veins in a patient with an atrial septal occluder and atrial fibrillation” (1, 2). We greatly appreciate her kind words and insightful reflections regarding the technical and clinical aspects of the case.

It is gratifying to see that our case has contributed to the growing conversation around ablation strategies in complex anatomical scenarios, and we hope it may serve as a practical reference for electrophysiologists encountering similar challenges.

Thank you again for your interest Randa Tabbah in our work and for taking the time to share your expertise. We look forward to future opportunities for dialogue and collaboration in this evolving field.

Kindest regards,
